## What you'll learn

- ✓ Completely refilmed for 2019
  - ✓ Create Express web servers and APIs
  - ✓ Use cutting-edge ES6/ES7 JavaScript
  - ✓ Create real-time web apps with SocketIO
- ✓ Build, test, and launch Node apps
  - ✓ Store data with Mongoose and MongoDB
  - ✓ Deploy your Node apps to production

## Current price

**\$32.99** ~~\$84.99~~ 61% off

- This course includes
- 📺 34.5 hours on-demand video
  - 📄 137 downloadable resources
  - 🌐 Full lifetime access
  - 📱 Access on mobile and TV
  - 🏆 Certificate of Completion

▶ Bonus: What should I learn next? ▾	02:47

## Requirements

- A computer on which you can install software (Windows, MacOS, or Linux)
- A basic understanding of JavaScript (variables, functions, objects, arrays, if statements)

## Description

**This course was just completely refilmed to give you everything you need to master Node.js in 2019!**

**This includes new content, updated versions, new features, and more.**

--

Have you tried to learn Node before? You start a new course, and the instructor has you installing a bunch of libraries before you even know what Node is or how it works. You eventually get stuck and reach out to the instructor, but you get no reply. You then close the course and never open it again.

9 months ago

I learned a lot from this course. I have started with no idea but learned a lot how to develop web apps using node.js and deploying them in Heroku. Highly recommended to everyone and the instructor is highly energetic person and friendly.
